

ROADMAP

(2025–2030)

Execution Roadmap (2025–2027)

Phase 1 — MVP Completion & Fundraising Prep (Q4 2025)

Objective

Build a launch-ready MVP and complete investor preparation.

Key Deliverables

- MVP finalized → AI Assistant + Analytics Engine + Agent Flow
- Full performance, security & stress testing
- Tokenomics & token utility finalization
- Fundraising package complete (Deck + Narrative + Data Room)

KPIs

- MVP Readiness 100%
- Internal latency <1s
- 0 high-risk bugs

Phase 2 — MVP Launch & Seed Round (Q1 2026)

Objective

Launch publicly, gather early users, and secure seed investment.

Key Deliverables

- Public MVP launch
- Seed Round execution (SAFE/SAFT structure)
- Team expansion (AI engineers, Web3 devs, product design)
- Community campaigns + KOL partnerships
- Token Utility Activation (Lite) → Staking + Early Access features

KPIs

- 10,000 users
- 25+ communities onboarded
- \$X seed raise target

Phase 3 — Ecosystem Expansion (Q2 – Q3 2026)

Objective

Transform BlockAI into a multi-agent, multi-platform AI ecosystem.

Key Deliverables

- AI Dashboard v2
- Agent Marketplace (Alpha Release)
- Telegram + Discord AI bot integrations
- Multi-wallet + DEX payment support
- Cross-chain expansion → EVM + SVM (Phase 1)
- Premium Subscription (Beta)

KPIs

- 50k–100k users
- 100+ AI agents listed
- First recurring monthly revenue

Phase 4 — Global Scaling & Monetization (Q4 2026 – 2027+)

Objective

Enterprise growth, global adoption, and monetizable ecosystem scaling.

Key Deliverables

- Premium Subscription v1 (full release)
- Enterprise API & SDK for institutions
- Multi-language rollout → Asia + MENA + EU
- Strategic partnerships (AI labs + Web3 L1/L2 networks)
- Licensing program for businesses & developers
- Full ecosystem scaling: Agents, Developers, Creators, B2B clients

KPIs

- 250k+ users
- 50+ enterprise clients
- Multi-chain support live

- Vision Roadmap (2028–2030)

Key Focus Areas

1

AI Agents v2/v3

Fully autonomous, adaptive agents for multi-chain DeFi and NFT interactions

2

Enterprise AI + Governance Layer

Institutional dashboards, enterprise API, governance participation, and decentralized protocol infrastructure

3

AI Marketplace

AI agent marketplace with tokenized reward system, B2B and community integrations

Goals by 2030:

- Fully autonomous AI-driven ecosystem
- Multi-chain integration covering all major Layer1 and Layer2 networks
- Scalable revenue streams → subscriptions, B2B licensing, token utility
- Global user base and enterprise adoption
- Establish BlockAI as the essential AI layer for Web4 and decentralized finance

BLOCK AI
